

# Phonics Scavenger Hunt

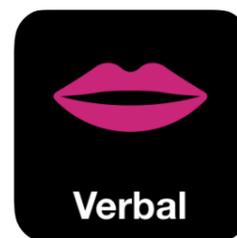

## Activity

Learners search the learning environment for objects beginning with the 'b' sound.

Learners capture a series of short video recordings of these objects in Clips.

Learners present their findings by adding posters, labels and emojis to their recordings in Clips.

## Clips

Clips is a great place to film and organise multiple pieces of information. In Clips, learners can easily add images and video while providing a spoken narrative. The meaning of these recordings can be enhanced by the use of posters, labels and stickers.

## Preparation

Learners are familiar with basic sound/letter relationships and spelling patterns.

Learners are familiar with the 'b' sound and have brainstormed some words beginning with 'b'.

Foundation - Level 2

## Related Ideas

- In English (or Language Other Than English), learners hunt for objects containing specific letter blends, digraphs, diphthongs, or other spelling patterns.
- In Maths, learners hunt for colours, textures, patterns, numbers, shapes, lines of symmetry or types of angles.
- Learners take photographs of objects beginning with various sounds/letters/blends and use Keynote to mask images with shapes of the relevant letters (see <https://bit.ly/2tD8wKG> for example and link to letter shape templates). Learners add voice recordings saying the words/sounds.

# Have a go.

1.	Open  and tap  to begin a new project.
2.	To add a poster, tap on  above the red record button. Select a poster style and tap on the text to change it (e.g. 'b' words). Hold  to animate the poster and record voice reading the text (speak while holding red record button).
3.	Find object beginning with the 'b' sound. Tap  and hold  for 3 seconds to record an image of the object and record voice saying the name of the object (speak while holding red record button).
4.	Tap on the thumbnail of the clip you have created at the bottom-left of the screen.
5.	Tap  . Select a label style to add to the clip. Tap on the label to change the text.
6.	Tap  to the left of the space bar to start dictation. Say the name of the object. Tap  to end dictation. <p style="text-align: center;">OR</p> Start typing the word and use predictive text suggestions at the top of the keyboard to complete the word.
7.	Select and tap again on the label text. Select 'Speak' to have the text read aloud. If the word is not spelled correctly, repeat Step 6 above.
8.	Drag label text to position on the clip. Pinch label text to increase or decrease size.
9.	Select a relevant emoji to add to the clip. Drag emoji to position on the clip and pinch to increase or decrease size.
10.	Tap  then  to finish editing the clip. Repeat Steps 3-9 for more objects.
11.	Tap  to add a soundtrack.
